COURTIN TISSAGE

WOVEN LEATHER And OTHER FIBERS
January 2025

ateliers courtin

About

The Ateliers Courtin offers leather panels woven using traditional techniques on old looms. This craftsmanship, originally developed for some of the world's most prestigious fashion houses, is now sought after by decorators and designers.

The workshops, dedicated to leatherworking techniques and research, are located in Pondicherry. Founder Cédric Courtin collaborates with experienced master craftsmen, rethinking and reinterpreting leather weaves, often combining them with other natural materials such as textiles, natural fibers, or paper yarns.

For interior design purposes, Cédric Courtin has developed weaves in various shades inspired by different universes. These weaves are adapted for decorative rolls suitable for covering walls, doors, and screens. Woven from leather and other fibers, these rolls can be incorporated into furnishings, adding an elegant touch to sofas, armchairs, headboards, and even smaller items like cushions, seat covers, or vases.

Technical information

The woven panels are supplied in rolls of 26 inch / 65 cm width with a length of 26 feet / 8 meters.

If required, we can join 2 panels to make a width of 50 inch.

On request, we can exceptionally provide a larger width of 3 feet / 90 cm

They can be used by an upholsterer for furniture, wall panelling or soft furnishings in the same way as fabric.

The lead time for production is 8-12 weeks with a minimum order of 3 rolls = 26 feet.

Surcharge fee is applicable for an order below.

Leather & Fibres

The woven leather panels are made from vegetable tanned leather, Semi Aniline leather, Faux Leather and for some references this leather is mixed with waxed flat laces, cotton cords, cotton ropes and jute ropes.

Vegetable tanning is the oldest natural method. It uses plant-based tannins. It is therefore completely acceptable to have differences in shades between orders. We are sourcing Semi Aniline leather from our Gold LWG partner. Faux leather is a recycled base material with PU coating.

The Papyrus reference do not use leather, it is entirely made with waxed paper strings.

This selection of references from the most flexible to the firmest can be laminated to a support, which allows you to meet the different needs of your projects, whether they are wall coverings, curtains, bedspreads, cushions.

We offer three roll laminated backing options :

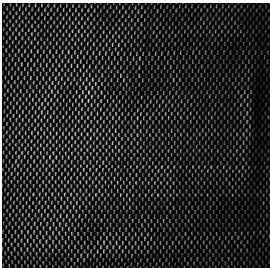

MICRO DOT: A non-woven material that retains the flexibility of the panel, which makes it comparable to furnishing fabrics for making curtains, bedspreads, cushions

K15: A medium thickness material, which improves the resistance of the panel and makes it ideal for upholstering furniture.

T185: A heavy gauge option that we recommend for wall panels.
